ASMIT SINGH

Information Science Engineering Student | Aspiring Software Engineer

Bengaluru, Karnataka | your.email@example.com | +91-XXXXXXXXXX

PROFESSIONAL SUMMARY

Information Science Engineering student at SJB Institute of Technology, Bengaluru, with knowledge of Java, C++, Data Structures and Algorithms, Computer Networks, and web development. Interested in software engineering, problem-solving, and full-stack development, with experience in academic projects, teamwork, and public speaking.

EDUCATION

SJB Institute of Technology, Bengaluru
Bachelor of Engineering — Information Science & Engineering
CGPA: 8.13 | Expected Graduation: 2028

TECHNICAL SKILLS

Programming: Java, C++

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Computer Networks

Web Technologies: HTML, CSS, JavaScript, React

Backend & Database: Node.js, Express.js, REST APIs, PostgreSQL

Tools: Git, GitHub, VS Code

PROJECTS

Full-Stack Task Management Web Application

React | *Node.js* | *Express.js* | *PostgreSQL* | *REST API*

- Developed a full-stack task management application with a responsive React frontend and Node.js/Express backend.
- Designed REST APIs for creating, updating, deleting, and retrieving tasks and connected the application to PostgreSQL.
- Implemented task status management, form validation, and structured API communication between frontend and backend.
- Used Git and GitHub for source-code management and organized the application into reusable components.

Smart Search Engine Simulator

Java | *Data Structures & Algorithms* | *HashMap* | *ArrayList*

- Built a Java-based search engine simulator that processes queries and retrieves relevant results using keyword matching.
- Implemented HashMap and ArrayList to manage website data, search history, and keyword frequency.
- Developed a popularity-based ranking mechanism to prioritize relevant results.
- Applied core Data Structures and Algorithms concepts to create an interactive search simulation.

City Map Explorer

Java | *Graph Algorithms* | *BFS* | *DFS* | *Dijkstra's Algorithm*

- Developed a graph-based city navigation system to represent locations and connections.
- Implemented BFS and DFS for graph traversal and exploration of connected locations.
- Used Dijkstra's Algorithm to calculate shortest paths between selected locations.
- Applied graph theory and algorithmic problem-solving to simulate real-world route navigation.

CERTIFICATIONS & ACHIEVEMENTS

- **NPTEL E-Business — Elite + Gold** | Score: 94
- **IIT Bombay Spoken Tutorial Courses:** Java and C
- Participated in public speaking activities.

SOFT SKILLS

Teamwork & Collaboration | Communication | Public Speaking | Problem Solving | Time Management | Adaptability | Leadership

EXTRACURRICULAR ACTIVITIES

Public Speaking: Participated in public speaking activities and developed confidence, presentation, and communication skills.
